Education

B.Tech in Computer Science and Engineering **Expected: May 2027**
Manipal Institute of Technology *Udupi, India*

- CGPA: 7.85
- **Relevant Coursework:** Design and Analysis of Algorithms (DAA), Formal Languages and Automata Theory (FLAT), Compiler Design, Parallel Computer Architecture Programming, Operating System (OS), Computer Networks (CN), Software Engineering, Java Programming, C Programming, Verilog, Data Structures (DS), Database Systems (DBS)

High School Diploma **Graduated: March, 2023**
Madhava Kripa English Nursery and Higher Primary School, Manipal– India *CBSE Curriculum*

- 10th : 91.6%
- 12th : 92.4%
- **Key Subjects:** Mathematics, Computer Science, Chemistry, Physics, and English

Projects

Full Stack Project: TaskFlow - Distributed Task Queue System **Github**

- Built a distributed task queue in Python using Redis Sorted Sets for priority scheduling and atomic dequeue, eliminating duplicate task processing across concurrent workers.
- Designed a real-time React dashboard with animated flow visualization using Canvas API and deployed the full system using Docker Compose across 4 isolated containers.

Diabetes Detection using Machine Learning **Github**

- Built a machine learning model to predict diabetes using the Pima Indians dataset
- Trained and evaluated multiple classifiers including Logistic Regression, Support Vector Machine,KNN and Naive Bayes
- Visualized data distributions and model insights using Matplotlib and Seaborn
- Tools Used: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Full Stack Project: Leave Management System **Github**

- Built a Leave Management System where employees can request leaves via a calendar and admins can approve/reject them, with automatic balance tracking using React, Flask, and SQLite.
- Deployed the full-stack app in a single Docker container using Docker Compose, with Gunicorn serving both the Flask API and the React frontend on a single port.

Skills

Languages: Python, Machine Learning, C++, C, Java, HTML, CSS, ARM Assembly

Frameworks: React, Flask, Django, FastAPI, REST API

Tools and Platforms: Visual Studio Code, Git, Docker, Docker Compose, Redis

Databases: SQLite, SQL

Soft Skills: Attention to detail, creative design, teamwork, effective communication

Certifications

Intro to Machine Learning **Feb 2026**
Kaggle

Generative AI for Everyone **Jan 2024**
DeepLearning.ai

Intro to Cloud Computing **Jan 2026**
IBM

Using Databases with Python **Jun 2025**
University of Michigan

The Legend of Python **Jun 2025**
Codedex

The Origins I:HTML **Jun 2025**
Codedex

Extracurricular Activities

Senior Member of PRISM

AIML Domain + Projects Domain

Participated in GenAI Hackathon

ChatBot Chronicles – AI Chatbot Workshop

Appointed as School Sports Minister for the academic year 2022–2023

Awarded Best Sports Boy of the Year 2022–2023
